GitHub Portfolio — Public and Private Project Inventory

This page presents a consolidated portfolio view of the repositories visible in the current GitHub inventory. Public repositories are linked. Private repositories are listed by name and described without publishing source code.

Inventory date: 2026-04-28
Total repositories listed: 97
Public repositories listed: 33
Private repositories listed: 64

Featured Technical Profile

Senior technical expert with 30+ years in IT, Linux, middleware integration, scripting, network/security diagnostics, system administration, and AI-assisted engineering.

Primary technical axes:

- AI tooling, local-first automation, conversation analysis, speech-to-text, and Codex/LLM documentation workflows.
- Kali Linux, firewalling, WiFi diagnostics, traffic capture, MITM lab routing, and defensive security automation.
- Bash and Python automation with dry-run-first execution, logs/results discipline, changelog-driven maintenance, and repository-wide documentation rules.
- System tooling around LUKS, LVM, backup, process analysis, browser diagnostics, Raspberry Pi, Tapo camera networking, and Textual/Rich dashboards.
- GitHub portfolio management, multi-repository synchronization, standard README/SPECIFICATIONS/WHY documentation, and repeatable project bootstrap.

Repository Catalogue

AI / Featured

Project	Visibility	Category	Public portfolio description
AI_information	Private	AI / Knowledge Base	Private AI information and reference corpus for models, workflows, prompts, and technical notes.
AI_Personal_data	Private	AI / Personal Knowledge	Private repository for AI-related personal data organization and controlled knowledge material.
AI_tools	Private	AI / Tooling	Private AI tooling repository for utilities, scripts, and local automation around AI-assisted workflows.
braveVTextension	Public	AI / Browser Extension	French local Whisper speech-to-text extension for Brave.
braveVTextension_en	Public	AI / Browser Extension	English local Whisper speech-to-text extension for Brave, privacy-first and cloud-free.
ChatGPTcreatecontext	Private	AI / Context Engineering	Private tooling around ChatGPT contextualization, prompt preparation, and structured AI context management.
codex-update-md	Public	AI / Documentation Automation	Script-driven Codex CLI workflow to synchronize README, specifications, WHY, changelog, and other Markdown documentation with repository content.
ColtSivers	Private	AI / Platform Bootstrap	Bootstrap and standardized project tree for the RikHunter-derived environment, with dry-run-first initialization, directory creation, symlink preparation, pipenv handling, and requirements export.
DeepEcho	Private	AI / Speech	Private DeepEcho speech/audio processing and transcription workspace.
DeepEcho_whisper	Public	AI / Speech	Local Whisper/whisper.cpp integration for speech-to-text and audio transcription workflows.
firefoxVTextension	Private	AI / Browser Extension	Private Firefox variant of the local voice-to-text extension workflow.
Gamblox	Private	AI / Experimental	Private AI/gaming experiment and automation workspace; code remains private.
NoXoZ4Hunt	Private	AI / Hunting	Private AI-assisted hunting/investigation workspace.
NoXoZVorteX	Public	AI / Analysis	AI conversation skill extractor and technical-skills matrix foundation.
NoXoZVorteX_prompted	Public	AI / Analysis	French AI conversation prompt executor for bulk analysis of exported ChatGPT, Claude, and LeChat conversations.
NoXoZVorteX_prompted_en	Public	AI / Analysis	English AI conversation prompt executor for bulk export analysis and report generation.

Project	Visibility	Category	Public portfolio description
NoXoZVorteX_working	Private	AI / Analysis	Private working repository for AI conversation analysis and skill extraction.
poc_mistral	Public	AI / PoC	Proof of concept repository for Mistral AI experimentation.
regles_contextualisation	Private	AI / Rules	Private contextualization rules repository for AI assistants, scripting conventions, and workflow governance.
RikHunter	Private	AI / FastAPI Platform	Local-first FastAPI platform for CV ingestion, vector indexing, document generation, SQLite inspection, ChromaDB, Ollama monitoring, and token-protected administration.
song_maker_AI_local	Private	AI / Music	Private local workflow around AI song generation, lyrics, audio processing, and media assembly.

Security & Network

Project	Visibility	Category	Public portfolio description
cmd.airmon-to-dos	Public	WiFi / Security	Kali command project around airmon/monitor-mode WiFi scanning and denial-of-service lab workflows.
iptables	Public	Firewall / Linux	Strict systemd-managed iptables firewall automation and boot-time deployment.
jeronimo	Private	Security / Investigation	Private investigation or automation workspace.
kdbx	Private	Security / Secrets	Private KeePass/KDBX-related storage or workflow repository; must remain private.
ManInTheMiddle	Private	Network / Security Lab	MITM traffic capture router for 5GHz hotspot, 2.4GHz hotspot, and Ethernet gateway capture modes, with service generation and firewall integration.
scan_security	Public	Security / Scanning	Security scanning toolkit for automated assessment and vulnerability-oriented checks.
scripts-wifi-scan	Public	WiFi / Security	Kali WiFi scanning suite using monitor-mode workflows and capture outputs.
ssh_hardening	Private	Security / Hardening	Private SSH hardening scripts and documentation.
tapo	Private	Network / Camera	Private TP-Link Tapo camera network, remote access, and diagnostics workspace.
wlaninfo	Private	WiFi / Diagnostics	Private WiFi interface information and diagnostic helper.

Linux System & Administration

Project	Visibility	Category	Public portfolio description
analyseProcess	Public	Linux / Analysis	System process analysis and monitoring toolkit.
backup_kali_root	Private	Backup / Kali	Private Kali root backup automation and documentation.
casa2koutou_config	Private	Migration / Kali	Private configuration migration repository between Kali environments.
casamovetokoutou	Private	Migration / Kali	Private migration helper for moving configuration from Casablanca to Koutoubia.
cmd.disable_brol_notneeded	Private	Linux / Cleanup	Private command set for disabling non-essential desktop/system noise and unwanted background components.

Project	Visibility	Category	Public portfolio description
dashboard	Private	Linux / TUI Monitoring	Textual/Rich TUI dashboard for real-time Linux supervision on a dedicated TTY: weather, system metrics, interfaces, hotspot services, Tapo, Tailscale, journal logs, and iptables alerts.
deluge	Private	Linux / Service	Private Deluge-related setup or service-management repository.
friture-kali	Public	Audio / Kali	Kali-oriented setup and documentation for Friture real-time audio spectrum analysis.
kali-deep-analyse-timeframe	Private	Kali / Forensics	Private Kali timeframe analysis and system investigation repository.
live-build-config	Private	Linux / Build System	Kali/Debian live-build configuration workspace for customized Linux image generation and reproducible build experiments.
QEMU-tapo	Private	Virtualization / Camera	Private QEMU-based Tapo test or emulation environment.
root_home	Private	Linux / Root Environment	Private root home configuration, scripts, and administrative material.
scripts_root	Private	Linux / Root Scripts	Private root-level scripts and system administration helpers.
systemctl_mounting	Public	Linux / systemd	Systemd-based volume mounting and service helper.

Storage, Backup & Encryption

Project	Visibility	Category	Public portfolio description
backup_create_report	Private	Backup / Reporting	Private backup reporting helper for producing structured backup reports.
brave_backup_restore	Private	Browser / Backup	Private Brave browser backup and restore workflow.
checkdeepdisk	Private	Storage / Audit	Private deep disk inspection and filesystem checking helper.
create_luks	Public	Storage / Encryption	Automated creation and management of LUKS encrypted volumes.
mountVG	Private	Storage / LVM	Private volume group mounting automation and documentation.
non_destructive_ntfs_audit	Public	Storage / Forensics	Non-destructive NTFS filesystem audit and analysis tooling.
usb_enc	Private	Storage / Encryption	Private USB encryption and removable-media security workflow.

Browser, Privacy & Desktop

Project	Visibility	Category	Public portfolio description
analyseBrave	Public	Browser / Analysis	Brave browser process, behavior, and performance analysis helper.
brave-fb-onlyme-extension	Public	Browser Extension	Brave extension project related to Facebook visibility/privacy workflow automation.
brave-fb-onlyme-extension-extract-info	Public	Browser Extension	Information extraction companion project for the Brave Facebook-only-me extension.

Media, Audio & Camera

Project	Visibility	Category	Public portfolio description
captureNoXoZ	Private	Capture / Utility	Private capture helper for local evidence, screen, or data collection workflows.

Project	Visibility	Category	Public portfolio description
<code>compressvideo</code>	Public	Media Processing	Video compression helper focused on practical ffmpeg-style workflows.
<code>mp4_to_images_per_second</code>	Public	Media Processing	Extracts images per second from MP4 videos for analysis, thumbnailing, or frame workflows.
<code>Overlook_record_cam</code>	Public	Camera / Recording	Camera recording and surveillance management suite.
<code>purgeaudio</code>	Public	Audio / Cleanup	Audio cleanup utility for purging or organizing audio-related files.

Raspberry Pi & Hardware

Project	Visibility	Category	Public portfolio description
<code>raspberry</code>	Private	Raspberry Pi	Private Raspberry Pi project workspace.
<code>raspberry-bt-scan</code>	Private	Bluetooth / Raspberry Pi	Private Bluetooth scan automation for Raspberry Pi.
<code>raspberry-micro</code>	Private	Raspberry Pi	Private Raspberry Pi micro setup or device workflow.
<code>raspberry-multiboot</code>	Private	Raspberry Pi	Private Raspberry Pi multiboot workflow.
<code>raspberry-post-install</code>	Private	Raspberry Pi	Private Raspberry Pi post-install automation.
<code>raspberry-scanbt</code>	Private	Bluetooth / Raspberry Pi	Private Raspberry Pi Bluetooth scanning project.
<code>raspberry-utils</code>	Private	Raspberry Pi	Private Raspberry Pi utility scripts.

GitHub, Automation & Documentation

Project	Visibility	Category	Public portfolio description
<code>catall</code>	Private	Utility	Private utility for concatenating or inspecting project files in bulk.
<code>cpx</code>	Public	Utility	Copy/transfer helper tooling for repeatable local file operations.
<code>create_gitignore</code>	Public	GitHub Automation	Generates project .gitignore files using standardized templates and local rules.
<code>create_repo</code>	Public	GitHub Automation	Automates GitHub repository creation and standard project initialization.
<code>create_repo_temp</code>	Public	GitHub Automation	Temporary repository creation and initialization experiment.
<code>diff_files_not_copied</code>	Public	Sync / Audit	Differential file audit tool for tracking files not copied between locations.
<code>findgit</code>	Private	Git / Utility	Private recursive Git repository discovery utility.
<code>init_project</code>	Public	Project Bootstrap	Project initialization helper for creating standardized repository structures and baseline files.
<code>Packages_Documentation</code>	Private	Documentation	Private package documentation and installation notes.
<code>Spoon-Knife</code>	Private	Testing / Demo	Private copy of the classic GitHub test/demo repository.
<code>TEST_REPO</code>	Private	Testing	Controlled test repository used for GitHub automation, repository initialization, and workflow validation.

Career, Portfolio & Knowledge

Project	Visibility	Category	Public portfolio description
Emploi	Private	Career	Private employment, CV, job search, and professional material repository.
Emploi_public	Private	Career / Portfolio	Private employment-facing public-material preparation repository.
NoXoZ_job	Private	Career / AI	Private job-search and AI-assisted professional positioning workspace.

Meta Repositories

Project	Visibility	Category	Public portfolio description
AI_Projects	Private	Meta Repository	Private umbrella repository for AI projects.
Projects_divers	Private	Meta Repository	Private umbrella repository for miscellaneous projects.
Projects_installation	Private	Meta Repository	Private umbrella repository for installation scripts and procedures.
Projects_multimedia	Private	Meta Repository	Private umbrella repository for multimedia scripts and documentation.
Projects_network	Private	Meta Repository	Private umbrella repository for network projects and documentation.
Projects_py	Private	Meta Repository	Private umbrella repository for Python projects.
Projects_security	Private	Meta Repository	Private umbrella repository for security projects and documentation.
Projects_system	Private	Meta Repository	Private umbrella repository for system-administration scripts and documentation.
Projects_utility	Private	Meta Repository	Private umbrella repository grouping utility projects and related documentation.

Archive / Miscellaneous

Project	Visibility	Category	Public portfolio description
bdeinoz.github.io	Public	Portfolio	GitHub Pages portfolio website.
convdocx	Public	Document Processing	DOCX conversion and document-processing utility.
createCONTACTfromApple	Private	Data Conversion	Private converter for Apple contact exports and contact-file normalization.
divers	Private	Miscellaneous	Large private miscellaneous workspace containing assorted experiments and retained material.
ods-cookbook	Private	Data / ODS	Private OpenDocument spreadsheet cookbook or reference repository.
scripts	Private	Scripts	Private scripts umbrella repository.
syncgit	Public	Git Automation	Recursive multi-repository Git synchronization, status audit, AGENTS propagation, pull workflow, branch snapshots, and visibility listing.

High-Impact Projects

RikHunter

RikHunter is a private local-first FastAPI platform for CV ingestion, vector indexing, document generation, operational administration, SQLite inspection, ChromaDB integration, optional Ollama monitoring, and token-protected administrative routes.

Portfolio positioning:

- Local-first AI/document platform.
- FastAPI service architecture.
- Vector indexing and document generation.
- Admin and monitoring endpoints.
- Private source code.

ColtSivers

ColtSivers is a private bootstrap and standardization layer derived from the RikHunter environment. It provides dry-run-first initialization, environment loading, directory provisioning, symlink preparation toward external BIGFILES storage, pipenv handling, and requirements export.

Portfolio positioning:

- Repository bootstrap architecture.
- Standardized project tree.
- Dry-run-first safety model.
- Environment-driven configuration.
- Private source code.

ManInTheMiddle

ManInTheMiddle is a private Linux traffic-capture router project with independent runtime modes for WiFi 5GHz hotspot, WiFi 2.4GHz hotspot, and Ethernet MITM gateway workflows. It includes systemd service generation, firewall integration, hostapd/dnsmasq runtime logic, logging, and operational documentation.

Portfolio positioning:

- Kali/Linux network lab.
- WiFi hotspot routing and traffic capture.
- Ethernet MITM gateway mode.
- iptables and service integration.
- Private source code.

dashboard

dashboard is a private Textual/Rich TUI dashboard for real-time Linux supervision on a dedicated TTY. It monitors system metrics, network interfaces, hotspot services, Tapo camera state, Tailscale, journal logs, weather, and iptables alert counters.

Portfolio positioning:

- Linux TUI monitoring.
- Textual/Rich Python application.
- Dedicated kiosk/TTY deployment.
- System and network observability.
- Private source code.

syncgit

`syncgit` is a public recursive multi-repository Git automation tool. It supports repository scanning, synchronization workflows, read-only status audits, pull workflows, branch snapshots, AGENTS propagation, GitHub visibility listing, and per-repository result/log generation.

Portfolio positioning:

- Multi-repository automation.
- GitHub workflow tooling.
- Safety guards and audit modes.
- Documentation and policy propagation.
- Public source code.

codex-update-md

`codex-update-md` is a public Codex CLI workflow wrapper that synchronizes Markdown documentation with actual repository content. It manages README, SPECIFICATIONS, SPECIFICATIONS_FR, WHY, CHANGELOG, INSTALL, prompts, logs, and results.

Portfolio positioning:

- AI-assisted documentation automation.
- Codex CLI integration.
- Specification-first maintenance.
- Repository documentation governance.
- Public source code.

NoXoZVorteX Family

The `NoXoZVorteX` repositories cover AI conversation export analysis, skill extraction, prompt execution, and structured reporting across ChatGPT, Claude, LeChat/Mistral, and related AI workflows.

Portfolio positioning:

- AI conversation analysis.
- Technical skills extraction.
- Bulk prompt execution.
- CSV/JSON/Markdown report generation.
- Public and private variants.

DeepEcho / DeepEcho_whisper

The DeepEcho repositories cover local audio transcription and Whisper/whisper.cpp workflows.

Portfolio positioning:

- Local speech-to-text.
- Whisper integration.
- Audio processing.
- Privacy-first transcription.
- Public and private variants.

braveVTTextension / braveVTTextension_en / firefoxVTTextension

Browser voice-to-text extension work around local Whisper transcription, privacy-first interaction, multilingual usage, and browser integration.

Portfolio positioning:

- Browser extension engineering.

- Local AI/STT integration.
- Privacy-first voice workflows.
- Brave and Firefox variants.
- Public and private variants.

iptables

`iptables` is a public strict Linux firewall automation repository for systemd-managed iptables deployment and boot-time firewall enforcement.

Portfolio positioning:

- Linux firewall engineering.
- systemd service integration.
- Strict default-deny approach.
- Operational firewall scripting.
- Public source code.

cmd.airmon-to-dos

`cmd.airmon-to-dos` is a public Kali WiFi command project around airmon/monitor-mode workflows, scanning, and denial-of-service lab testing.

Portfolio positioning:

- Kali WiFi lab tooling.
- Monitor-mode workflow automation.
- Denial-of-service lab context.
- Wireless testing scripts.
- Public source code.

Skills Reflected by the Repository Set

AI and LLM Engineering

- ChatGPT, Claude, Mistral, Codex, Whisper, local AI workflows.
- AI conversation export parsing and skill extraction.
- Prompt execution pipelines.
- Documentation generation and repository-aware AI workflows.
- Local-first and privacy-first AI tooling.

Linux and Kali Engineering

- Kali Linux operational tooling.
- systemd services and kiosk/TTY deployment.
- iptables firewalling.
- LUKS/LVM/storage automation.
- Process and browser diagnostics.
- Backup, migration, and cleanup scripts.

Security and Network Workflows

- WiFi scanning and monitor-mode workflows.

- Traffic capture router design.
- MITM lab routing and controlled network diagnostics.
- SSH hardening.
- Firewall service management.
- Camera/Tapo network analysis.

Automation and Scripting

- Bash shell automation.
- Python FastAPI/Textual tooling.
- Dry-run-first script design.
- Logs/results/changelog discipline.
- Recursive repository operations.
- GitHub repository management.

Media, Audio and Video

- Whisper transcription.
- Friture/Kali audio spectrum analysis.
- MP4 frame extraction.
- Video compression.
- Camera recording workflows.
- AI song/media processing support.

Raspberry Pi and Hardware

- Raspberry Pi post-install tooling.
- Bluetooth scanning.
- Multiboot workflows.
- Micro-device workflows.
- Utility scripts for small Linux devices.

Public Repositories

- **analyseBrave** — Brave browser process, behavior, and performance analysis helper.
- **analyseProcess** — System process analysis and monitoring toolkit.
- **bdelnoz.github.io** — GitHub Pages portfolio website.
- **brave-fb-onlyme-extension** — Brave extension project related to Facebook visibility/privacy workflow automation.
- **brave-fb-onlyme-extension-extract-info** — Information extraction companion project for the Brave Facebook-only-me extension.
- **braveVTTextension** — French local Whisper speech-to-text extension for Brave.
- **braveVTTextension_en** — English local Whisper speech-to-text extension for Brave, privacy-first and cloud-free.
- **cmd.airmon-to-dos** — Kali command project around airmon/monitor-mode WiFi scanning and denial-of-service lab workflows.
- **codex-update-md** — Script-driven Codex CLI workflow to synchronize README, specifications, WHY, changelog, and other Markdown documentation with repository content.
- **compressvideo** — Video compression helper focused on practical ffmpeg-style workflows.
- **convdocx** — DOCX conversion and document-processing utility.
- **cpx** — Copy/transfer helper tooling for repeatable local file operations.
- **create_gitignore** — Generates project .gitignore files using standardized templates and local rules.

- **create_luks** — Automated creation and management of LUKS encrypted volumes.
- **create_repo** — Automates GitHub repository creation and standard project initialization.
- **create_repo_temp** — Temporary repository creation and initialization experiment.
- **DeepEcho_whisper** — Local Whisper/whisper.cpp integration for speech-to-text and audio transcription workflows.
- **diff_files_not_copied** — Differential file audit tool for tracking files not copied between locations.
- **friture-kali** — Kali-oriented setup and documentation for Friture real-time audio spectrum analysis.
- **init_project** — Project initialization helper for creating standardized repository structures and baseline files.
- **iptables** — Strict systemd-managed iptables firewall automation and boot-time deployment.
- **mp4_to_images_per_second** — Extracts images per second from MP4 videos for analysis, thumbnailing, or frame workflows.
- **non_destructive_ntfs_audit** — Non-destructive NTFS filesystem audit and analysis tooling.
- **NoXoZVorteX** — AI conversation skill extractor and technical-skills matrix foundation.
- **NoXoZVorteX_prompted** — French AI conversation prompt executor for bulk analysis of exported ChatGPT, Claude, and LeChat conversations.
- **NoXoZVorteX_prompted_en** — English AI conversation prompt executor for bulk export analysis and report generation.
- **Overlook_record_cam** — Camera recording and surveillance management suite.
- **poc_mistral** — Proof of concept repository for Mistral AI experimentation.
- **purgeaudio** — Audio cleanup utility for purging or organizing audio-related files.
- **scan_security** — Security scanning toolkit for automated assessment and vulnerability-oriented checks.
- **scripts-wifi-scan** — Kali WiFi scanning suite using monitor-mode workflows and capture outputs.
- **syncgit** — Recursive multi-repository Git synchronization, status audit, AGENTS propagation, pull workflow, branch snapshots, and visibility listing.
- **systemctl_mounting** — Systemd-based volume mounting and service helper.

Private Repositories Represented in Portfolio

The following repositories are private. They are intentionally not linked. Their names and non-source descriptions are included for portfolio visibility.

- **AI_information** — Private AI information and reference corpus for models, workflows, prompts, and technical notes.
- **AI_Personal_data** — Private repository for AI-related personal data organization and controlled knowledge material.
- **AI_Projects** — Private umbrella repository for AI projects.
- **AI_tools** — Private AI tooling repository for utilities, scripts, and local automation around AI-assisted workflows.
- **backup_create_report** — Private backup reporting helper for producing structured backup reports.
- **backup_kali_root** — Private Kali root backup automation and documentation.
- **brave_backup_restore** — Private Brave browser backup and restore workflow.
- **captureNoXoZ** — Private capture helper for local evidence, screen, or data collection workflows.
- **casa2koutou_config** — Private configuration migration repository between Kali environments.
- **casamovetokoutou** — Private migration helper for moving configuration from Casablanca to Koutoubia.
- **catall** — Private utility for concatenating or inspecting project files in bulk.
- **ChatGPTcreatecontext** — Private tooling around ChatGPT contextualization, prompt preparation, and structured AI context management.
- **checkdeepdisk** — Private deep disk inspection and filesystem checking helper.
- **cmd.disable_brol_notneeded** — Private command set for disabling non-essential desktop/system noise and unwanted background components.
- **ColtSivers** — Bootstrap and standardized project tree for the RikHunter-derived environment, with dry-run-first initialization, directory creation, symlink preparation, pipenv handling, and requirements export.
- **createCONTACTfromApple** — Private converter for Apple contact exports and contact-file normalization.
- **dashboard** — Textual/Rich TUI dashboard for real-time Linux supervision on a dedicated TTY: weather, system metrics, interfaces, hotspot services, Tapo, Tailscale, journal logs, and iptables alerts.

- **DeepEcho** — Private DeepEcho speech/audio processing and transcription workspace.
- **deluge** — Private Deluge-related setup or service-management repository.
- **divers** — Large private miscellaneous workspace containing assorted experiments and retained material.
- **Emploi** — Private employment, CV, job search, and professional material repository.
- **Emploi_public** — Private employment-facing public-material preparation repository.
- **findgit** — Private recursive Git repository discovery utility.
- **firefoxVTextension** — Private Firefox variant of the local voice-to-text extension workflow.
- **Gamblox** — Private AI/gaming experiment and automation workspace; code remains private.
- **jeronimo** — Private investigation or automation workspace.
- **kali-deep-analyse-timeframe** — Private Kali timeframe analysis and system investigation repository.
- **kdbx** — Private KeePass/KDBX-related storage or workflow repository; must remain private.
- **live-build-config** — Kali/Debian live-build configuration workspace for customized Linux image generation and reproducible build experiments.
- **ManInTheMiddle** — MITM traffic capture router for 5GHz hotspot, 2.4GHz hotspot, and Ethernet gateway capture modes, with service generation and firewall integration.
- **mountVG** — Private volume group mounting automation and documentation.
- **NoXoZ4Hunt** — Private AI-assisted hunting/investigation workspace.
- **NoXoZ_job** — Private job-search and AI-assisted professional positioning workspace.
- **NoXoZVortex_working** — Private working repository for AI conversation analysis and skill extraction.
- **ods-cookbook** — Private OpenDocument spreadsheet cookbook or reference repository.
- **Packages_Documentation** — Private package documentation and installation notes.
- **Projects_divers** — Private umbrella repository for miscellaneous projects.
- **Projects_installation** — Private umbrella repository for installation scripts and procedures.
- **Projects_multimedia** — Private umbrella repository for multimedia scripts and documentation.
- **Projects_network** — Private umbrella repository for network projects and documentation.
- **Projects_py** — Private umbrella repository for Python projects.
- **Projects_security** — Private umbrella repository for security projects and documentation.
- **Projects_system** — Private umbrella repository for system-administration scripts and documentation.
- **Projects_utility** — Private umbrella repository grouping utility projects and related documentation.
- **QEMU-tapo** — Private QEMU-based Tapo test or emulation environment.
- **rasperry** — Private Raspberry Pi project workspace.
- **rasperry-bt-scan** — Private Bluetooth scan automation for Raspberry Pi.
- **rasperry-micro** — Private Raspberry Pi micro setup or device workflow.
- **rasperry-multiboot** — Private Raspberry Pi multiboot workflow.
- **rasperry-post-install** — Private Raspberry Pi post-install automation.
- **rasperry-scanbt** — Private Raspberry Pi Bluetooth scanning project.
- **rasperry-utils** — Private Raspberry Pi utility scripts.
- **regles_contextualisation** — Private contextualization rules repository for AI assistants, scripting conventions, and workflow governance.
- **RikHunter** — Local-first FastAPI platform for CV ingestion, vector indexing, document generation, SQLite inspection, ChromaDB, Ollama monitoring, and token-protected administration.
- **root_home** — Private root home configuration, scripts, and administrative material.
- **scripts** — Private scripts umbrella repository.
- **scripts_root** — Private root-level scripts and system administration helpers.
- **song_maker_AI_local** — Private local workflow around AI song generation, lyrics, audio processing, and media assembly.
- **Spoon-Knife** — Private copy of the classic GitHub test/demo repository.
- **ssh_hardening** — Private SSH hardening scripts and documentation.
- **tapo** — Private TP-Link Tapo camera network, remote access, and diagnostics workspace.
- **TEST_REPO** — Controlled test repository used for GitHub automation, repository initialization, and workflow validation.
- **usb_enc** — Private USB encryption and removable-media security workflow.

Professional Summary

I build practical technical systems: scripts, services, dashboards, automation pipelines, local AI workflows, security labs, and Linux operational tooling. The repository set shows a strong preference for real operational use over abstract demonstration code.

The portfolio combines:

- long-term Linux and infrastructure experience;
- modern AI integration and LLM-assisted workflows;
- defensive security, network diagnostics, and controlled lab tooling;
- documentation-first repository engineering;
- practical automation for daily technical work.

Repository Count Summary

Type	Count
Public repositories	33
Private repositories	64
Total repositories	97

Notes for Publication

This generated page is designed as a replacement candidate for `index.md` in `bdelnoz.github.io`. It intentionally links public repositories and leaves private repositories unlinked while preserving project names and portfolio descriptions.

Detailed Category Matrix

AI / Featured — Detailed View

AI_information

- **Visibility:** private repository
- **Category:** AI / Knowledge Base
- **Portfolio description:** Private AI information and reference corpus for models, workflows, prompts, and technical notes.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around ai / knowledge base, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

AI_Personal_data

- **Visibility:** private repository
- **Category:** AI / Personal Knowledge
- **Portfolio description:** Private repository for AI-related personal data organization and controlled knowledge material.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around ai / personal knowledge, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

AI_tools

- **Visibility:** private repository
- **Category:** AI / Tooling
- **Portfolio description:** Private AI tooling repository for utilities, scripts, and local automation around AI-assisted workflows.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around ai / tooling, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

braveVTTextension

- **Visibility:** public repository
- **Category:** AI / Browser Extension
- **Portfolio description:** French local Whisper speech-to-text extension for Brave.
- **Source access:** <https://github.com/bdelnoz/braveVTTextension>
- **Portfolio value:** Demonstrates practical engineering around ai / browser extension, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

braveVTTextension_en

- **Visibility:** public repository
- **Category:** AI / Browser Extension
- **Portfolio description:** English local Whisper speech-to-text extension for Brave, privacy-first and cloud-free.
- **Source access:** https://github.com/bdelnoz/braveVTTextension_en
- **Portfolio value:** Demonstrates practical engineering around ai / browser extension, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

ChatGPTcreatecontext

- **Visibility:** private repository
- **Category:** AI / Context Engineering
- **Portfolio description:** Private tooling around ChatGPT contextualization, prompt preparation, and structured AI context management.
- **Source access:** private source code

- **Portfolio value:** Demonstrates practical engineering around ai / context engineering, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

codex-update-md

- **Visibility:** public repository
- **Category:** AI / Documentation Automation
- **Portfolio description:** Script-driven Codex CLI workflow to synchronize README, specifications, WHY, changelog, and other Markdown documentation with repository content.
- **Source access:** <https://github.com/bdelnoz/codex-update-md>
- **Portfolio value:** Demonstrates practical engineering around ai / documentation automation, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

ColtSivers

- **Visibility:** private repository
- **Category:** AI / Platform Bootstrap
- **Portfolio description:** Bootstrap and standardized project tree for the RikHunter-derived environment, with dry-run-first initialization, directory creation, symlink preparation, pipenv handling, and requirements export.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around ai / platform bootstrap, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

DeepEcho

- **Visibility:** private repository
- **Category:** AI / Speech
- **Portfolio description:** Private DeepEcho speech/audio processing and transcription workspace.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around ai / speech, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

DeepEcho_whisper

- **Visibility:** public repository
- **Category:** AI / Speech
- **Portfolio description:** Local Whisper/whisper.cpp integration for speech-to-text and audio transcription workflows.
- **Source access:** https://github.com/bdelnoz/DeepEcho_whisper
- **Portfolio value:** Demonstrates practical engineering around ai / speech, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

firefoxVTTextension

- **Visibility:** private repository
- **Category:** AI / Browser Extension
- **Portfolio description:** Private Firefox variant of the local voice-to-text extension workflow.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around ai / browser extension, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

Gamblox

- **Visibility:** private repository
- **Category:** AI / Experimental
- **Portfolio description:** Private AI/gaming experiment and automation workspace; code remains private.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around ai / experimental, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

NoXoZ4Hunt

- **Visibility:** private repository
- **Category:** AI / Hunting
- **Portfolio description:** Private AI-assisted hunting/investigation workspace.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around ai / hunting, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

NoXoZVorteX

- **Visibility:** public repository
- **Category:** AI / Analysis
- **Portfolio description:** AI conversation skill extractor and technical-skills matrix foundation.
- **Source access:** <https://github.com/bdelnoz/NoXoZVorteX>
- **Portfolio value:** Demonstrates practical engineering around ai / analysis, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

NoXoZVorteX_prompted

- **Visibility:** public repository
- **Category:** AI / Analysis
- **Portfolio description:** French AI conversation prompt executor for bulk analysis of exported ChatGPT, Claude, and LeChat conversations.
- **Source access:** https://github.com/bdelnoz/NoXoZVorteX_prompted
- **Portfolio value:** Demonstrates practical engineering around ai / analysis, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

NoXoZVorteX_prompted_en

- **Visibility:** public repository
- **Category:** AI / Analysis
- **Portfolio description:** English AI conversation prompt executor for bulk export analysis and report generation.
- **Source access:** https://github.com/bdelnoz/NoXoZVorteX_prompted_en
- **Portfolio value:** Demonstrates practical engineering around ai / analysis, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

NoXoZVorteX_working

- **Visibility:** private repository
- **Category:** AI / Analysis
- **Portfolio description:** Private working repository for AI conversation analysis and skill extraction.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around ai / analysis, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

poc_mistral

- **Visibility:** public repository
- **Category:** AI / PoC
- **Portfolio description:** Proof of concept repository for Mistral AI experimentation.
- **Source access:** https://github.com/bdelnoz/poc_mistral
- **Portfolio value:** Demonstrates practical engineering around ai / poc, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

regles_contextualisation

- **Visibility:** private repository
- **Category:** AI / Rules

- **Portfolio description:** Private contextualization rules repository for AI assistants, scripting conventions, and workflow governance.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around ai / rules, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

RikHunter

- **Visibility:** private repository
- **Category:** AI / FastAPI Platform
- **Portfolio description:** Local-first FastAPI platform for CV ingestion, vector indexing, document generation, SQLite inspection, ChromaDB, Ollama monitoring, and token-protected administration.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around ai / fastapi platform, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

song_maker_AI_local

- **Visibility:** private repository
- **Category:** AI / Music
- **Portfolio description:** Private local workflow around AI song generation, lyrics, audio processing, and media assembly.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around ai / music, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

Security & Network — Detailed View

cmd.airmon-to-dos

- **Visibility:** public repository
- **Category:** WiFi / Security
- **Portfolio description:** Kali command project around airmon/monitor-mode WiFi scanning and denial-of-service lab workflows.
- **Source access:** <https://github.com/bdelnoz/cmd.airmon-to-dos>
- **Portfolio value:** Demonstrates practical engineering around wifi / security, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

iptables

- **Visibility:** public repository
- **Category:** Firewall / Linux
- **Portfolio description:** Strict systemd-managed iptables firewall automation and boot-time deployment.
- **Source access:** <https://github.com/bdelnoz/iptables>
- **Portfolio value:** Demonstrates practical engineering around firewall / linux, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

jeronimo

- **Visibility:** private repository
- **Category:** Security / Investigation
- **Portfolio description:** Private investigation or automation workspace.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around security / investigation, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

kdbx

- **Visibility:** private repository

- **Category:** Security / Secrets
- **Portfolio description:** Private KeePass/KDBX-related storage or workflow repository; must remain private.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around security / secrets, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

ManInTheMiddle

- **Visibility:** private repository
- **Category:** Network / Security Lab
- **Portfolio description:** MITM traffic capture router for 5GHz hotspot, 2.4GHz hotspot, and Ethernet gateway capture modes, with service generation and firewall integration.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around network / security lab, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

scan_security

- **Visibility:** public repository
- **Category:** Security / Scanning
- **Portfolio description:** Security scanning toolkit for automated assessment and vulnerability-oriented checks.
- **Source access:** https://github.com/bdelnoz/scan_security
- **Portfolio value:** Demonstrates practical engineering around security / scanning, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

scripts-wifi-scan

- **Visibility:** public repository
- **Category:** WiFi / Security
- **Portfolio description:** Kali WiFi scanning suite using monitor-mode workflows and capture outputs.
- **Source access:** <https://github.com/bdelnoz/scripts-wifi-scan>
- **Portfolio value:** Demonstrates practical engineering around wifi / security, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

ssh_hardening

- **Visibility:** private repository
- **Category:** Security / Hardening
- **Portfolio description:** Private SSH hardening scripts and documentation.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around security / hardening, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

tapo

- **Visibility:** private repository
- **Category:** Network / Camera
- **Portfolio description:** Private TP-Link Tapo camera network, remote access, and diagnostics workspace.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around network / camera, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

wlaninfo

- **Visibility:** private repository
- **Category:** WiFi / Diagnostics
- **Portfolio description:** Private WiFi interface information and diagnostic helper.
- **Source access:** private source code

- **Portfolio value:** Demonstrates practical engineering around wifi / diagnostics, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

Linux System & Administration — Detailed View

analyseProcess

- **Visibility:** public repository
- **Category:** Linux / Analysis
- **Portfolio description:** System process analysis and monitoring toolkit.
- **Source access:** <https://github.com/bdelnoz/analyseProcess>
- **Portfolio value:** Demonstrates practical engineering around linux / analysis, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

backup_kali_root

- **Visibility:** private repository
- **Category:** Backup / Kali
- **Portfolio description:** Private Kali root backup automation and documentation.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around backup / kali, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

casa2koutou_config

- **Visibility:** private repository
- **Category:** Migration / Kali
- **Portfolio description:** Private configuration migration repository between Kali environments.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around migration / kali, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

casamovetokoutou

- **Visibility:** private repository
- **Category:** Migration / Kali
- **Portfolio description:** Private migration helper for moving configuration from Casablanca to Koutoubia.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around migration / kali, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

cmd.disable_brol_notneeded

- **Visibility:** private repository
- **Category:** Linux / Cleanup
- **Portfolio description:** Private command set for disabling non-essential desktop/system noise and unwanted background components.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around linux / cleanup, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

dashboard

- **Visibility:** private repository
- **Category:** Linux / TUI Monitoring
- **Portfolio description:** Textual/Rich TUI dashboard for real-time Linux supervision on a dedicated TTY: weather, system metrics, interfaces, hotspot services, Tapo, Tailscale, journal logs, and iptables alerts.
- **Source access:** private source code

- **Portfolio value:** Demonstrates practical engineering around linux / tui monitoring, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

deluge

- **Visibility:** private repository
- **Category:** Linux / Service
- **Portfolio description:** Private Deluge-related setup or service-management repository.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around linux / service, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

friture-kali

- **Visibility:** public repository
- **Category:** Audio / Kali
- **Portfolio description:** Kali-oriented setup and documentation for Friture real-time audio spectrum analysis.
- **Source access:** <https://github.com/bdelnoz/friture-kali>
- **Portfolio value:** Demonstrates practical engineering around audio / kali, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

kali-deep-analyse-timeframe

- **Visibility:** private repository
- **Category:** Kali / Forensics
- **Portfolio description:** Private Kali timeframe analysis and system investigation repository.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around kali / forensics, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

live-build-config

- **Visibility:** private repository
- **Category:** Linux / Build System
- **Portfolio description:** Kali/Debian live-build configuration workspace for customized Linux image generation and reproducible build experiments.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around linux / build system, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

QEMU-tapo

- **Visibility:** private repository
- **Category:** Virtualization / Camera
- **Portfolio description:** Private QEMU-based Tapo test or emulation environment.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around virtualization / camera, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

root_home

- **Visibility:** private repository
- **Category:** Linux / Root Environment
- **Portfolio description:** Private root home configuration, scripts, and administrative material.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around linux / root environment, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

scripts_root

- **Visibility:** private repository
- **Category:** Linux / Root Scripts
- **Portfolio description:** Private root-level scripts and system administration helpers.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around linux / root scripts, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

systemctl_mounting

- **Visibility:** public repository
- **Category:** Linux / systemd
- **Portfolio description:** Systemd-based volume mounting and service helper.
- **Source access:** https://github.com/bdelnoz/systemctl_mounting
- **Portfolio value:** Demonstrates practical engineering around linux / systemd, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

Storage, Backup & Encryption — Detailed View

backup_create_report

- **Visibility:** private repository
- **Category:** Backup / Reporting
- **Portfolio description:** Private backup reporting helper for producing structured backup reports.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around backup / reporting, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

brave_backup_restore

- **Visibility:** private repository
- **Category:** Browser / Backup
- **Portfolio description:** Private Brave browser backup and restore workflow.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around browser / backup, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

checkdeepdisk

- **Visibility:** private repository
- **Category:** Storage / Audit
- **Portfolio description:** Private deep disk inspection and filesystem checking helper.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around storage / audit, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

create_luks

- **Visibility:** public repository
- **Category:** Storage / Encryption
- **Portfolio description:** Automated creation and management of LUKS encrypted volumes.
- **Source access:** https://github.com/bdelnoz/create_luks
- **Portfolio value:** Demonstrates practical engineering around storage / encryption, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

mountVG

- **Visibility:** private repository

- **Category:** Storage / LVM
- **Portfolio description:** Private volume group mounting automation and documentation.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around storage / lvm, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

non_destructive_ntfs_audit

- **Visibility:** public repository
- **Category:** Storage / Forensics
- **Portfolio description:** Non-destructive NTFS filesystem audit and analysis tooling.
- **Source access:** https://github.com/bdelnoz/non_destructive_ntfs_audit
- **Portfolio value:** Demonstrates practical engineering around storage / forensics, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

usb_enc

- **Visibility:** private repository
- **Category:** Storage / Encryption
- **Portfolio description:** Private USB encryption and removable-media security workflow.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around storage / encryption, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

Browser, Privacy & Desktop — Detailed View

analyseBrave

- **Visibility:** public repository
- **Category:** Browser / Analysis
- **Portfolio description:** Brave browser process, behavior, and performance analysis helper.
- **Source access:** <https://github.com/bdelnoz/analyseBrave>
- **Portfolio value:** Demonstrates practical engineering around browser / analysis, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

brave-fb-onlyme-extension

- **Visibility:** public repository
- **Category:** Browser Extension
- **Portfolio description:** Brave extension project related to Facebook visibility/privacy workflow automation.
- **Source access:** <https://github.com/bdelnoz/brave-fb-onlyme-extension>
- **Portfolio value:** Demonstrates practical engineering around browser extension, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

brave-fb-onlyme-extension-extract-info

- **Visibility:** public repository
- **Category:** Browser Extension
- **Portfolio description:** Information extraction companion project for the Brave Facebook-only-me extension.
- **Source access:** <https://github.com/bdelnoz/brave-fb-onlyme-extension-extract-info>
- **Portfolio value:** Demonstrates practical engineering around browser extension, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

Media, Audio & Camera — Detailed View

captureNoXoZ

- **Visibility:** private repository

- **Category:** Capture / Utility
- **Portfolio description:** Private capture helper for local evidence, screen, or data collection workflows.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around capture / utility, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

compressvideo

- **Visibility:** public repository
- **Category:** Media Processing
- **Portfolio description:** Video compression helper focused on practical ffmpeg-style workflows.
- **Source access:** <https://github.com/bdelnoz/compressvideo>
- **Portfolio value:** Demonstrates practical engineering around media processing, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

mp4_to_images_per_second

- **Visibility:** public repository
- **Category:** Media Processing
- **Portfolio description:** Extracts images per second from MP4 videos for analysis, thumbnailing, or frame workflows.
- **Source access:** https://github.com/bdelnoz/mp4_to_images_per_second
- **Portfolio value:** Demonstrates practical engineering around media processing, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

Overlook_record_cam

- **Visibility:** public repository
- **Category:** Camera / Recording
- **Portfolio description:** Camera recording and surveillance management suite.
- **Source access:** https://github.com/bdelnoz/Overlook_record_cam
- **Portfolio value:** Demonstrates practical engineering around camera / recording, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

purgeaudio

- **Visibility:** public repository
- **Category:** Audio / Cleanup
- **Portfolio description:** Audio cleanup utility for purging or organizing audio-related files.
- **Source access:** <https://github.com/bdelnoz/purgeaudio>
- **Portfolio value:** Demonstrates practical engineering around audio / cleanup, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

Raspberry Pi & Hardware — Detailed View

rasperry

- **Visibility:** private repository
- **Category:** Raspberry Pi
- **Portfolio description:** Private Raspberry Pi project workspace.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around raspberry pi, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

rasperry-bt-scan

- **Visibility:** private repository
- **Category:** Bluetooth / Raspberry Pi
- **Portfolio description:** Private Bluetooth scan automation for Raspberry Pi.

- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around bluetooth / raspberry pi, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

raspberry-micro

- **Visibility:** private repository
- **Category:** Raspberry Pi
- **Portfolio description:** Private Raspberry Pi micro setup or device workflow.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around raspberry pi, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

raspberry-multiboot

- **Visibility:** private repository
- **Category:** Raspberry Pi
- **Portfolio description:** Private Raspberry Pi multiboot workflow.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around raspberry pi, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

raspberry-post-install

- **Visibility:** private repository
- **Category:** Raspberry Pi
- **Portfolio description:** Private Raspberry Pi post-install automation.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around raspberry pi, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

raspberry-scanbt

- **Visibility:** private repository
- **Category:** Bluetooth / Raspberry Pi
- **Portfolio description:** Private Raspberry Pi Bluetooth scanning project.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around bluetooth / raspberry pi, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

raspberry-utils

- **Visibility:** private repository
- **Category:** Raspberry Pi
- **Portfolio description:** Private Raspberry Pi utility scripts.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around raspberry pi, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

GitHub, Automation & Documentation — Detailed View

catall

- **Visibility:** private repository
- **Category:** Utility
- **Portfolio description:** Private utility for concatenating or inspecting project files in bulk.
- **Source access:** private source code

- **Portfolio value:** Demonstrates practical engineering around utility, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

cpx

- **Visibility:** public repository
- **Category:** Utility
- **Portfolio description:** Copy/transfer helper tooling for repeatable local file operations.
- **Source access:** <https://github.com/bdelnoz/cpx>
- **Portfolio value:** Demonstrates practical engineering around utility, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

create_gitignore

- **Visibility:** public repository
- **Category:** GitHub Automation
- **Portfolio description:** Generates project .gitignore files using standardized templates and local rules.
- **Source access:** https://github.com/bdelnoz/create_gitignore
- **Portfolio value:** Demonstrates practical engineering around github automation, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

create_repo

- **Visibility:** public repository
- **Category:** GitHub Automation
- **Portfolio description:** Automates GitHub repository creation and standard project initialization.
- **Source access:** https://github.com/bdelnoz/create_repo
- **Portfolio value:** Demonstrates practical engineering around github automation, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

create_repo_temp

- **Visibility:** public repository
- **Category:** GitHub Automation
- **Portfolio description:** Temporary repository creation and initialization experiment.
- **Source access:** https://github.com/bdelnoz/create_repo_temp
- **Portfolio value:** Demonstrates practical engineering around github automation, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

diff_files_not_copied

- **Visibility:** public repository
- **Category:** Sync / Audit
- **Portfolio description:** Differential file audit tool for tracking files not copied between locations.
- **Source access:** https://github.com/bdelnoz/diff_files_not_copied
- **Portfolio value:** Demonstrates practical engineering around sync / audit, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

findgit

- **Visibility:** private repository
- **Category:** Git / Utility
- **Portfolio description:** Private recursive Git repository discovery utility.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around git / utility, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

init_project

- **Visibility:** public repository
- **Category:** Project Bootstrap
- **Portfolio description:** Project initialization helper for creating standardized repository structures and baseline files.
- **Source access:** https://github.com/bdelnoz/init_project
- **Portfolio value:** Demonstrates practical engineering around project bootstrap, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

Packages_Documentation

- **Visibility:** private repository
- **Category:** Documentation
- **Portfolio description:** Private package documentation and installation notes.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around documentation, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

Spoon-Knife

- **Visibility:** private repository
- **Category:** Testing / Demo
- **Portfolio description:** Private copy of the classic GitHub test/demo repository.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around testing / demo, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

TEST_REPO

- **Visibility:** private repository
- **Category:** Testing
- **Portfolio description:** Controlled test repository used for GitHub automation, repository initialization, and workflow validation.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around testing, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

Career, Portfolio & Knowledge — Detailed View

Emploi

- **Visibility:** private repository
- **Category:** Career
- **Portfolio description:** Private employment, CV, job search, and professional material repository.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around career, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

Emploi_public

- **Visibility:** private repository
- **Category:** Career / Portfolio
- **Portfolio description:** Private employment-facing public-material preparation repository.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around career / portfolio, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

NoXoZ_job

- **Visibility:** private repository
- **Category:** Career / AI
- **Portfolio description:** Private job-search and AI-assisted professional positioning workspace.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around career / ai, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

Meta Repositories — Detailed View

AI_Projects

- **Visibility:** private repository
- **Category:** Meta Repository
- **Portfolio description:** Private umbrella repository for AI projects.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around meta repository, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

Projects_divers

- **Visibility:** private repository
- **Category:** Meta Repository
- **Portfolio description:** Private umbrella repository for miscellaneous projects.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around meta repository, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

Projects_installation

- **Visibility:** private repository
- **Category:** Meta Repository
- **Portfolio description:** Private umbrella repository for installation scripts and procedures.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around meta repository, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

Projects_multimedia

- **Visibility:** private repository
- **Category:** Meta Repository
- **Portfolio description:** Private umbrella repository for multimedia scripts and documentation.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around meta repository, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

Projects_network

- **Visibility:** private repository
- **Category:** Meta Repository
- **Portfolio description:** Private umbrella repository for network projects and documentation.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around meta repository, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

Projects_py

- **Visibility:** private repository

- **Category:** Meta Repository
- **Portfolio description:** Private umbrella repository for Python projects.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around meta repository, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

Projects_security

- **Visibility:** private repository
- **Category:** Meta Repository
- **Portfolio description:** Private umbrella repository for security projects and documentation.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around meta repository, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

Projects_system

- **Visibility:** private repository
- **Category:** Meta Repository
- **Portfolio description:** Private umbrella repository for system-administration scripts and documentation.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around meta repository, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

Projects_utility

- **Visibility:** private repository
- **Category:** Meta Repository
- **Portfolio description:** Private umbrella repository grouping utility projects and related documentation.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around meta repository, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

Archive / Miscellaneous — Detailed View

bdelnoz.github.io

- **Visibility:** public repository
- **Category:** Portfolio
- **Portfolio description:** GitHub Pages portfolio website.
- **Source access:** <https://github.com/bdelnoz/bdelnoz.github.io>
- **Portfolio value:** Demonstrates practical engineering around portfolio, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

convdocx

- **Visibility:** public repository
- **Category:** Document Processing
- **Portfolio description:** DOCX conversion and document-processing utility.
- **Source access:** <https://github.com/bdelnoz/convdocx>
- **Portfolio value:** Demonstrates practical engineering around document processing, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

createCONTACTfromApple

- **Visibility:** private repository
- **Category:** Data Conversion
- **Portfolio description:** Private converter for Apple contact exports and contact-file normalization.

- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around data conversion, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

divers

- **Visibility:** private repository
- **Category:** Miscellaneous
- **Portfolio description:** Large private miscellaneous workspace containing assorted experiments and retained material.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around miscellaneous, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

ods-cookbook

- **Visibility:** private repository
- **Category:** Data / ODS
- **Portfolio description:** Private OpenDocument spreadsheet cookbook or reference repository.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around data / ods, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

scripts

- **Visibility:** private repository
- **Category:** Scripts
- **Portfolio description:** Private scripts umbrella repository.
- **Source access:** private source code
- **Portfolio value:** Demonstrates practical engineering around scripts, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.

syncgit

- **Visibility:** public repository
- **Category:** Git Automation
- **Portfolio description:** Recursive multi-repository Git synchronization, status audit, AGENTS propagation, pull workflow, branch snapshots, and visibility listing.
- **Source access:** <https://github.com/bdelnoz/syncgit>
- **Portfolio value:** Demonstrates practical engineering around git automation, repeatable workflows, documentation discipline, and Linux/AI/security-oriented implementation.
