GitHub Portfolio Projects (public + private showcase – generated 28/04/2026)

Total repositories listed: 103

- **Public repositories linked:** 39
- **Private repositories showcased without source links:** 64

Private projects are intentionally listed as portfolio entries only. Their names and functional descriptions are shown; private source links are not published.

Featured Technical Projects

Project	Visibility	Stack	Description
RikHunter	Private	Python / AI	Private local-first FastAPI platform for CV ingestion, vector indexing, document generation, SQLite inspection, ChromaDB, optional Ollama monitoring, and token-protected administration.
ColtSivers	Private	Python / AI	Private structured bootstrap and project-standardization repository derived from the RikHunter framework; focuses on dry-run-first initialization, storage layout, symlinks, Pipenv, requirements generation, and standardized documentation.
ManInTheMiddle	Private	Mixed	Private MITM traffic capture router project for controlled lab use, with Wi-Fi 5GHz, Wi-Fi 2.4GHz, Ethernet gateway modes, hostapd/dnsmasq/iptables integration, systemd services, and structured runtime profiles.
dashboard	Private	Python / AI	Private Textual/Rich Linux TUI dashboard for real-time system, network, hotspot, firewall, Tapo, Tailscale, journalctl, and weather monitoring on a dedicated TTY.
syncgit	Public	Shell / Linux	Public recursive Git repository synchronization tool supporting status audits, custom commands, pull workflows, AGENTS propagation, visibility listing, and guarded push behavior.
codex-update-md	Public	Mixed	Public Codex CLI automation workflow that synchronizes repository Markdown documentation with the actual project content, including specifications, changelog, installation notes, and bilingual specification handling.
NoXoZVorteX_prompted_en	Public	Python / AI	Public English AI prompt executor for bulk processing exported AI conversations with CSV/JSON/Markdown reporting.
DeepEcho_whisper	Public	Python / AI	Public Whisper/whisper.cpp integration project for local speech-to-text workflows and audio transcription experiments.
braveVTextension_en	Public	Browser / JS / Shell	Public privacy-first Brave extension for local Whisper speech-to-text, English-oriented documentation, and local voice transcription.
cmd.airmon-to-dos	Public	Shell / Linux	Public Kali Wi-Fi denial-of-service and scanning command project around airmon/aircrack-ng workflows.
friture-kali	Public	Shell / Linux	Public Kali-focused Friture installation and build workflow for real-time audio spectrum analysis.
rtk-reduce-tokens	Public	Python / AI	Public token-reduction utility for compressing or reducing AI context payloads.

AI & LLM Tooling

Project	Visibility	Stack	Description
Gamblox	Private	Python / AI	Private AI/game-oriented experiment repository used for applied prototyping, media/code assets, and exploratory automation work.
DeepEcho_whisper	Public	Python / AI	Public Whisper/whisper.cpp integration project for local speech-to-text workflows and audio transcription experiments.
DeepEcho	Private	Python / AI	Private audio/AI transcription and echo-processing project related to local STT workflows.

Project	Visibility	Stack	Description
ChatGPTcreatecontext	Private	Python / AI	Private tooling around ChatGPT context creation, conversation packaging, and reusable AI context material.
AI_Personal_data	Private	Python / AI	Private personal AI data repository used as a controlled knowledge source and private data inventory; public portfolio description only, no content exposed.
AI_information	Private	Python / AI	Private AI information and reference repository collecting AI-related notes, documentation, and technical context.
AI_tools	Private	Python / AI	Private AI tooling workspace for experiments, helper scripts, and AI workflow utilities.
AI_Projects	Private	Python / AI	Private umbrella repository for AI projects.
poc_mistral	Public	Python / AI	Public Mistral AI proof-of-concept repository.
rtk-reduce-tokens	Public	Python / AI	Public token-reduction utility for compressing or reducing AI context payloads.
RikHunter	Private	Python / AI	Private local-first FastAPI platform for CV ingestion, vector indexing, document generation, SQLite inspection, ChromaDB, optional Ollama monitoring, and token-protected administration.
ColtSivers	Private	Python / AI	Private structured bootstrap and project-standardization repository derived from the RikHunter framework; focuses on dry-run-first initialization, storage layout, symlinks, Pipenv, requirements generation, and standardized documentation.
codex-update-md	Public	Mixed	Public Codex CLI automation workflow that synchronizes repository Markdown documentation with the actual project content, including specifications, changelog, installation notes, and bilingual specification handling.

Voice, Browser & Local Transcription

Project	Visibility	Stack	Description
braveVTTextension_en	Public	Browser / JS / Shell	Public privacy-first Brave extension for local Whisper speech-to-text, English-oriented documentation, and local voice transcription.
braveVTTextension	Public	Browser / JS / Shell	Public French-oriented Brave extension for local Whisper speech-to-text and privacy-first voice input.
firefoxVTTextension	Private	Browser / JS / Shell	Private Firefox variant of the local voice transcription browser extension workflow.
brave-fb-onlyme-extension	Public	Browser / JS / Shell	Public Brave browser extension project around Facebook visibility/privacy automation.
brave-fb-onlyme-extension-extract-info	Public	Browser / JS / Shell	Public companion/extraction project for the Brave Facebook visibility extension.

Security, WiFi & Network Labs

Project	Visibility	Stack	Description
cmd.airmon-to-dos	Public	Shell / Linux	Public Kali Wi-Fi denial-of-service and scanning command project around airmon/aircrack-ng workflows.
scripts-wifi-scan	Public	Shell / Linux	Public Kali Wi-Fi scanning suite around monitor mode, capture output, and recon-oriented wireless diagnostics.

Project	Visibility	Stack	Description
scan_security	Public	Shell / Linux	Public security scanning toolkit for automated assessment and diagnostic workflows.
ManInTheMiddle	Private	Mixed	Private MITM traffic capture router project for controlled lab use, with Wi-Fi 5GHz, Wi-Fi 2.4GHz, Ethernet gateway modes, hostapd/dnsmasq/iptables integration, systemd services, and structured runtime profiles.
iptables	Public	Shell / Linux	Public strict systemd + iptables firewall automation repository.
ssh_hardening	Private	Shell / Linux	Private SSH hardening project for Linux server/client security baselines.
tapo	Private	Shell / Linux	Private TP-Link Tapo camera/network integration workspace used for controlled diagnostics and remote-access analysis.
QEMU-tapo	Private	Shell / Linux	Private QEMU/Tapo lab project for virtualization-based camera/network testing.
wlaninfo	Private	Mixed	Private wireless-interface information and diagnostics utility.
Projects_security	Private	Mixed	Private umbrella repository for security labs, defensive tooling, audit material, and Kali workflows.
Projects_network	Private	Mixed	Private umbrella repository for network engineering scripts, labs, diagnostics, and documentation.
rtl88x2bu	Public	C / Driver	Public Realtek rtl88x2bu Linux Wi-Fi driver fork with DKMS and kernel compatibility focus.
owasp-modsecurity-crs	Public	Mixed	Public OWASP ModSecurity Core Rule Set fork/reference repository.
active-directory-dotnet-webapi-manual-jwt-validation	Public	Mixed	Public Azure Active Directory / .NET Web API JWT validation reference project.

System Administration, Kali & Storage

Project	Visibility	Stack	Description
live-build-config	Private	Mixed	Private Kali/Debian live-build configuration workspace for custom system images and controlled installation profiles.
backup_kali_root	Private	Shell / Linux	Private Kali root backup workflow for controlled system backup and restore operations.
backup_create_report	Private	Shell / Linux	Private backup reporting utility for generating structured reports from backup operations.
cmd.disable_brol_notneeded	Private	Shell / Linux	Private Kali cleanup and service-disabling command set for removing unnecessary desktop/system noise.
root_home	Private	Mixed	Private root home backup/configuration repository for Linux system administration.
scripts_root	Private	Shell / Linux	Private root-level script repository for administrative and system-maintenance automation.
systemctl_mounting	Public	Shell / Linux	Public systemd-based mounting helper for controlled volume mounting workflows.
create_luks	Public	Shell / Linux	Public LUKS encryption automation helper for creating and managing encrypted volumes.

Project	Visibility	Stack	Description
usb_enc	Private	Mixed	Private USB encryption and secure removable-storage workflow repository.
kali-deep-analyse-timeframe	Private	Python / AI	Private Kali deep analysis repository for timeframe-based forensic/system review workflows.
dashboard	Private	Python / AI	Private Textual/Rich Linux TUI dashboard for real-time system, network, hotspot, firewall, Tapo, Tailscale, journalctl, and weather monitoring on a dedicated TTY.
casamovetokoutou	Private	Mixed	Private migration workflow for moving configuration and material from the Casablanca Kali environment to the Koutoubia Kali environment.
casa2koutou_config	Private	Mixed	Private configuration migration repository for Casablanca-to-Koutoubia system transition.
mountVG	Private	Shell / Linux	Private LVM volume group mounting helper for encrypted/storage workflows.
analyseProcess	Public	Mixed	Public process analysis and monitoring toolkit for Linux troubleshooting.
analyseBrave	Public	Browser / JS / Shell	Public Brave browser analysis utility for inspecting activity, runtime behavior, and performance-related process details.
diff_files_not_copied	Public	Mixed	Public differential file comparison utility to identify files not copied or synchronized.
findgit	Private	Mixed	Private recursive Git repository discovery and reporting utility.
syncgit	Public	Shell / Linux	Public recursive Git repository synchronization tool supporting status audits, custom commands, pull workflows, AGENTS propagation, visibility listing, and guarded push behavior.
Projects_system	Private	Mixed	Private umbrella repository for Linux system tooling, diagnostics, and operational scripts.
Projects_installation	Private	Mixed	Private umbrella repository for installation procedures, setup scripts, and deployment documentation.
Packages_Documentation	Private	Markdown / Docs	Private package documentation workspace for installation notes, package behavior, and system references.
brave_backup_restore	Private	Browser / JS / Shell	Private Brave browser backup and restore workflow.
deluge	Private	Mixed	Private Deluge/torrent-related configuration or automation workspace.

GitHub, Project Automation & Utilities

Project	Visibility	Stack	Description
create_repo	Public	Shell / Linux	Public GitHub automation utility for creating and configuring repositories consistently from the command line.
create_repo_temp	Public	Shell / Linux	Public temporary repository creation/testing helper.
create_gitignore	Public	Shell / Linux	Public helper for generating project <code>.gitignore</code> files adapted to local workflows and sensitive-file exclusion rules.
init_project	Public	Mixed	Public project bootstrap utility for initializing standardized project repositories and documentation skeletons.

Project	Visibility	Stack	Description
cata11	Private	Mixed	Private utility to concatenate or inspect grouped file content across project trees.
cpx	Public	Mixed	Public copy/transfer utility project for controlled file copy workflows and scripting automation.
convdocx	Public	Markdown / Docs	Public document-conversion utility focused on DOCX-related workflows and automation.
checkdeepdisk	Private	Python / AI	Private deep disk inspection utility for storage checks, reports, and filesystem diagnostics.
non_destructive_ntfs_audit	Public	Mixed	Public non-destructive NTFS audit tool designed to inspect filesystems without altering source media.
TEST_REPO	Private	Mixed	Private test repository used for validating GitHub workflows, automation behavior, and repository bootstrap patterns.
scripts	Private	Shell / Linux	Private scripts umbrella repository.
Projects_utility	Private	Mixed	Private umbrella repository for utility scripts and small operational tools.
Projects_py	Private	Mixed	Private umbrella repository for Python projects and reusable Python tooling.
Projects_divers	Private	Mixed	Private umbrella repository for miscellaneous local projects.
Spoon-Knife	Private	Mixed	Private test/fork-style repository retained for GitHub workflow experiments.
ods-cookbook	Private	Mixed	Private OpenDocument spreadsheet cookbook/reference repository.

Multimedia, Audio, Video & Capture

Project	Visibility	Stack	Description
compressvideo	Public	Shell / Linux	Public video compression tool built around practical ffmpeg workflows and quality-preserving output.
friture-kali	Public	Shell / Linux	Public Kali-focused Friture installation and build workflow for real-time audio spectrum analysis.
mp4_to_images_per_second	Public	Shell / Linux	Public MP4 frame extraction utility for generating image sequences from video at controlled intervals.
Overlook_record_cam	Public	Mixed	Public camera recording and surveillance-management workflow using shell automation.
song_maker_AI_local	Private	Python / AI	Private local AI song-making workflow repository for lyrics-to-song, media assembly, ffmpeg processing, and related automation.
captureNoXoZ	Private	Mixed	Private capture utility for screenshots, media capture, or local evidence-gathering workflows.
purgeaudio	Public	Shell / Linux	Public audio cleanup utility for automated audio file organization and removal workflows.
Projects_multimedia	Private	Mixed	Private umbrella repository for multimedia tooling, audio/video workflows, ffmpeg experiments, and documentation.
lucivy	Public	Python / AI	Public web/application project retained in the portfolio as an active software experiment.

Raspberry Pi & Embedded

Project	Visibility	Stack	Description
<code>rasperry</code>	Private	Shell / Linux	Private Raspberry Pi umbrella workspace for embedded Linux, automation, and device experiments.
<code>rasperry-micro</code>	Private	Shell / Linux	Private Raspberry Pi micro-project repository.
<code>rasperry-scanbt</code>	Private	Shell / Linux	Private Raspberry Pi Bluetooth scanning and detection project.
<code>rasperry-post-install</code>	Private	Shell / Linux	Private Raspberry Pi post-install automation and baseline setup repository.
<code>rasperry-utils</code>	Private	Shell / Linux	Private Raspberry Pi utility scripts repository.
<code>rasperry-bt-scan</code>	Private	Shell / Linux	Private Bluetooth scan implementation for Raspberry Pi environments.
<code>rasperry-multiboot</code>	Private	Shell / Linux	Private Raspberry Pi multiboot workflow repository.

Career, Documentation & Personal Knowledge

Project	Visibility	Stack	Description
<code>Emloi_public</code>	Private	Markdown / Docs	Private/public-facing career material repository for CV, portfolio, and job-search documentation.
<code>Emloi</code>	Private	Markdown / Docs	Private employment and career documentation workspace.
<code>NoXoZ_job</code>	Private	Mixed	Private job-search and professional-positioning repository.
<code>NoXoZVorteX_working</code>	Private	Python / AI	Private working branch/repository for AI conversation analysis and skills extraction.
<code>NoXoZVorteX_prompted</code>	Public	Python / AI	Public French AI conversation prompt executor for bulk analysis of exported AI conversations with custom prompts and structured outputs.
<code>NoXoZ4Hunt</code>	Private	Mixed	Private hunting/research-oriented variant in the NoXoZ tooling family.
<code>NoXoZVorteX</code>	Public	Python / AI	Public skill extractor from AI conversations used to build a technical skills matrix from large exported conversation sets.
<code>NoXoZVorteX_prompted_en</code>	Public	Python / AI	Public English AI prompt executor for bulk processing exported AI conversations with CSV/JSON/Markdown reporting.
<code>regles_contextualisation</code>	Private	Mixed	Private rulebook repository containing contextualization, scripting, and AI-agent operating rules.
<code>kdbx</code>	Private	Markdown / Docs	Private password-database related repository; portfolio only states the existence of internal secure-storage workflows, no content exposed.
<code>divers</code>	Private	Mixed	Private miscellaneous repository for uncategorized notes, scripts, media, and experimental material.
<code>bdelnoz.github.io</code>	Public	Mixed	Public GitHub Pages portfolio site presenting technical profile, projects, and professional positioning.
<code>Mega_s4-specs</code>	Public	Markdown / Docs	Public specification repository for the Mega S4 project.
<code>createCONTACTfromApple</code>	Private	Shell / Linux	Private tool for transforming Apple contact exports into structured contact material.

Other Repositories

Project	Visibility	Stack	Description
<code>jeronimo</code>	Private	Mixed	Private operational project repository; portfolio-safe description kept intentionally broad.

Technical Expertise

Artificial Intelligence & Local AI Workflows

- Local-first AI tooling, prompt execution, LLM workflow automation, conversation export analysis, token reduction, and AI documentation pipelines.
- Whisper / whisper.cpp local speech-to-text integration, privacy-first voice transcription, browser extension workflows, and audio transcription automation.
- FastAPI, vector indexing, document generation, SQLite inspection, ChromaDB, Ollama integration, and administrative API tooling.

Linux, Kali, Security & Network Engineering

- Kali Linux security workflows, Wi-Fi diagnostics, monitor-mode tooling, packet capture labs, iptables/systemd firewalling, MITM capture-router lab design, and defensive network analysis.
- LUKS encryption, LVM/storage workflows, systemd services, backup automation, process analysis, browser analysis, TTY dashboards, and hardened Linux administration.

Automation & Repository Engineering

- Large-scale shell automation, recursive Git repository management, AGENTS/SPECIFICATIONS documentation governance, Codex CLI workflows, project bootstrap scripts, and reproducible repository layouts.
- Strong emphasis on dry-run-first execution, changelog discipline, structured logs/results, non-destructive defaults, and explicit execution gates.

Multimedia, Audio & Capture

- ffmpeg-based video compression, frame extraction, camera capture workflows, local audio spectrum tooling, and AI-assisted music/media production pipelines.

Executive Summary

Senior technical expert with 30+ years of IT and software engineering experience across Linux systems, automation, network security, AI tooling, middleware integration, and operational diagnostics.

The project portfolio combines public open-source repositories and private internal tooling. Public repositories expose reusable tools and documentation. Private repositories demonstrate larger operational systems, security labs, personal automation frameworks, and controlled infrastructure workflows without publishing source code.

Core strengths include advanced Bash/Python automation, Kali Linux operations, local AI workflows, secure-by-default scripting, GitHub repository management, technical documentation, and practical system/network troubleshooting.

Contact & Availability

- **Email:** bruno.delnos@protonmail.com
- **GitHub:** github.com/bdelnoz
- **LinkedIn:** linkedin.com/in/bdelnoz
- **Location:** Rochefort, Wallonia, Belgium
- **Availability:** Immediate
- **Work mode:** Remote / Hybrid / On-site
