TARGET PROFILE - GENAI EXPERT / KEYES

Hands-on GenAI expert combining enterprise infrastructure, API integration, data security and practical AI delivery. Able to identify business use cases, design GenAI roadmaps, build POCs, integrate LLM/RAG/agent solutions into existing systems, and explain technical choices to business and IT stakeholders. Strongest differentiation: production-grade mindset from regulated environments, plus concrete AI projects built with Python, FastAPI, Ollama/Mistral, ChromaDB, Docker, Whisper and automation tooling.

POSITIONING FOR KEYES GENAI EXPERT ROLE

- Business-driven GenAI adoption:** translate operational pain points into realistic AI use cases, prioritised roadmaps and implementable POCs.
- Prompt engineering and RAG:** structured prompts, ReAct-style workflows, retrieval-augmented generation, vector search and quality-oriented prompt iteration.
- Evaluation and optimisation:** benchmark prompts/models, track quality/latency/cost, design feedback loops and improve model selection and orchestration.
- Integration and testing:** API-first architecture, FastAPI/REST, Docker, CI/CD, structured testing, secure data flows and production handover documentation.
- Responsible AI:** security-by-design, GDPR/data governance awareness, access control, privacy-first local AI patterns and audit-ready documentation.
- Leadership:** certified trainer background, mentoring, communication with architects/engineers/business stakeholders, standardisation culture.

SKILLS ALIGNMENT MATRIX

KEYES requirement	Experience	Evidence / positioning
Prompt engineering / ReAct / RAG / Chain-of-Thought	5+ years	Structured prompt frameworks, RAG design, ReAct-style agent patterns, quality-focused prompt optimisation.
GenAI applications and agent integration	5+ years	NoXoZ_job local RAG agent, NoXoZVorteX AI analysis, OpenAI/Claude/Mistral/Ollama usage, custom AI workflows.
AI evaluation, benchmarking and quality control	3+ years	Human feedback loops, output comparison, regression checks, prompt/version control, latency/cost/quality trade-offs.
Python / FastAPI / REST API development	5+ years	FastAPI, Streamlit, API integration, document generation pipelines, JSON/XML/CSV processing.
Cloud, containers and deployment	8+ years cloud/DevOps	Azure hybrid production, Docker/Docker Compose, CI/CD. AWS Bedrock: architecture-level knowledge and rapid ramp-up; strongest production cloud background is Azure/on-premise.
Observability and monitoring	6+ years	Prometheus, Grafana, ELK/Elasticsearch, structured logging, performance dashboards, operational alerting.
Data security and compliance	20+ years	GDPR, AI governance awareness, access control, encryption, OAuth2/SAML/PKI, PSD2, PCI-DSS, DORA-sensitive environments.
Leadership, mentoring and communication	18+ years	Certified trainer, 200+ training hours, mentoring, documentation, stakeholder communication with technical and non-technical teams.

SELECTED GENAI AND AI DELIVERY PROJECTS

NoXoZ_job - Local RAG Agent for professional documents | 2024-Present

- Designed a 100% offline intelligent agent for professional document generation and knowledge retrieval.
- Architecture: FastAPI + Ollama/Mistral + ChromaDB + SQLite + Streamlit + Docker Compose.
- Multi-format ingestion pipeline: Markdown, DOCX, PDF, JSON, XML; vector storage and semantic retrieval.
- Demonstrates secure on-premise GenAI patterns: data control, private knowledge base, API integration and documentation.

NoXoZVorteX / AI conversation intelligence | 2024-Present

- Built tooling to analyse 900+ AI conversations and extract technical skill patterns, topics and reusable knowledge.
- Applied custom prompt execution, classification, JSON/CSV/Markdown outputs, parallel processing and model-assisted analysis.
- Relevant for AI evaluation, benchmark preparation, prompt iteration, knowledge extraction and data-driven AI governance.

Privacy-first Voice AI / Whisper local STT | 2024-Present

- Designed local voice-to-text workflows using Whisper/whisper.cpp with zero cloud dependency.
- Focus on confidentiality, user trust, secure AI interaction and operational usability through browser extension integration.
- Relevant to KEYES clients needing trusted GenAI adoption with strong data protection constraints.

Prompt engineering framework and AI operating rules | 2024-Present

- Created structured prompt engineering rules and operational standards for AI assistants and agents.
- Covers role framing, context control, deterministic outputs, documentation standards, validation loops and safety boundaries.
- Useful for establishing repeatable GenAI delivery standards across teams.

PROFESSIONAL EXPERIENCE

AI Solutions Architect / GenAI & Automation Projects | 2024-Present

- Designed and implemented AI workflows combining LLMs, RAG, APIs, automation and privacy-first local infrastructure.
- Built reusable prototypes and internal tools for document processing, conversation analysis, speech transcription and AI-assisted delivery.
- Used Python, FastAPI, Streamlit, Ollama, Mistral, ChromaDB, SQLite, Docker, Bash, Git and structured technical documentation.
- Focused on pragmatic delivery: POC, functional validation, technical documentation, secure deployment and business usability.

ING Belgium - Senior Middleware Integration Architect / Service Chief Level 4 | 2019-2025

- Led hybrid cloud migration initiatives connecting on-premise critical infrastructure with Azure cloud services.
- Built observability stack with Prometheus, Grafana and Elasticsearch/ELK; reduced MTTD from 45 minutes to 3 minutes.
- Delivered CI/CD automation reducing deployment time from 4 hours to 20 minutes; solution adopted by other teams.
- Mentored junior engineers and produced 200+ pages of operational and architecture documentation.
- Relevant to GenAI delivery: production discipline, cloud integration, observability, governance and stakeholder alignment.

BNP Paribas Fortis - Senior Axway Consultant / API & Security Architecture | 2017-2018

- Designed production API Gateway cluster and API Manager platform for regulated banking services.
- Implemented OAuth2, SAML, mutual TLS, PSD2/SCA and eIDAS certificate flows; audit passed with zero critical findings.
- Created 60+ REST APIs and 200+ custom policies; improved average response time from 620ms to 290ms.
- Relevant to GenAI integration: secure APIs, access control, regulatory constraints, performance and reliability.

Axway Software Belgium - Senior Consultant & Certified Trainer | 2007-2018

- Delivered 40+ enterprise projects across banking, government, insurance, retail, telecom and automotive sectors.
- Designed API Gateway, MFT and security architectures, including high-availability and critical infrastructure contexts.
- Certified trainer for API Gateway, Transfer CFT and XFB Gateway; 200+ training hours delivered to 100+ professionals.
- Relevant to KEYES leadership: client advisory, knowledge transfer, standardisation, mentoring and pragmatic solution delivery.

TECHNICAL STACK FOR GENAI DELIVERY

Domain	Technologies / capability
GenAI / LLM	OpenAI API, ChatGPT, Claude, Mistral, Ollama, Whisper/whisper.cpp, prompt engineering, agents, ReAct, RAG, Chain-of-Thought patterns.
RAG / data	ChromaDB, SQLite, embeddings/vector concepts, document ingestion, CSV/JSON/XML/Markdown/DOCX/PDF pipelines, data extraction.
Application development	Python, FastAPI, Streamlit, REST APIs, JavaScript/Node.js, Bash automation, Git/GitHub, modular documentation.
Cloud / deployment	Docker, Docker Compose, CI/CD, GitHub Actions, Azure DevOps, Azure hybrid cloud. AWS Bedrock: keyword-aware, architecture-level and rapid ramp-up positioning.
Observability	Prometheus, Grafana, ELK/Elasticsearch, structured logs, metrics, dashboards, alerting, quality/performance follow-up.
Security / governance	GDPR, AI Act awareness, DORA-sensitive environments, OAuth2, SAML, JWT, PKI, TLS/mTLS, access control, data minimisation.
Leadership / consulting	POC leadership, benchmark framing, stakeholder workshops, technical coaching, documentation, training, standardisation.

EDUCATION, CERTIFICATIONS AND CONTINUOUS LEARNING

- Build with AI: Create Deterministic MCP Agents - LinkedIn Learning, 2026.
- OpenAI API for Python Developers - LinkedIn Learning, 2026.
- Automate Development Tasks with OpenAI Codex - LinkedIn Learning, 2026.
- Build REST APIs with FastAPI - LinkedIn Learning, 2026.
- Build with AI: Gradio Interfaces from Zero to Deployment - LinkedIn Learning, 2026.
- Cloud Computing and Cloud Administration - LinkedIn Learning, 2023/2026.
- CCSP preparation series completed: cloud concepts, data security, platform security, cloud application security, operations, legal/risk/compliance.
- Axway Certified Trainer - API Gateway, Transfer CFT, XFB Gateway; 200+ training hours delivered.

LEADERSHIP AND COMMUNICATION

- **Client advisory:** translate complex technical options into clear decisions for business, IT, architects and delivery teams.
- **Mentoring:** support engineers and architects through coaching, documentation, review practices and hands-on knowledge transfer.
- **Standardisation culture:** define repeatable patterns for prompts, APIs, deployments, documentation, security controls and operational handover.
- **Change support:** help non-specialist stakeholders understand realistic AI use cases, risks, benefits and operational impact.

LANGUAGES AND AVAILABILITY

French	Native	English	C1 technical/professional
Dutch	Professional working proficiency	Availability	Immediate / short notice - hybrid Belgium/Luxembourg

VALUE PROPOSITION FOR KEYES

- A rare bridge profile: senior enterprise architect + hands-on GenAI builder + security/governance mindset.
- Can lead POCs and benchmarks, but also understand production constraints: cost, latency, monitoring, security, auditability and change management.
- Best suited for clients needing practical GenAI adoption, not theoretical AI presentations: use-case identification, prototype, integration, evaluation and handover.
