

BRUNO DELNOZ

Linux Security Expert | Red Hat Linux | Identity, Hardening, Monitoring & Incident Response

30+ Years IT & Infrastructure | 20+ Years Security | 25+ Years Linux/UNIX | 40+ Enterprise Projects | BNP Brussels Experience

Rochefort, Belgium | Brussels Hybrid | bruno.delnoz@protonmail.com | +32 456 88 24 57 | github.com/bdelnoz | linkedin.com/in/bdelnoz

TARGETED PROFILE - LINUX SECURITY EXPERT BNP BRUSSELS

Senior Linux and infrastructure security expert with 30+ years of IT experience across banking, government and enterprise environments, including direct BNP Paribas Fortis experience in Brussels and 6 years at ING Belgium. Strong fit for Linux security operations, OS hardening, authentication/authorization, PKI, security monitoring, vulnerability remediation, audit support, DORA-oriented control plans and hybrid cloud migration initiatives.

Core positioning for this mission: secure Linux infrastructure, identity and access management, LDAP/Kerberos-related authentication concepts, PKI/certificate lifecycle, Bash automation, monitoring/observability, L3 incident response and regulated banking operations.

Mission Requirement	Candidate Fit
Start / Work model	ASAP / Brussels hybrid 50% on-site - experienced with Brussels banking hybrid models
On-call rotation	Experienced with critical infrastructure support, L3 operations and incident response in banking environments
Linux security	25+ years Linux/UNIX; Debian/Ubuntu/RHEL/CentOS/Kali; hardening, patching, security tooling
Identity / LDAP / Kerberos	Strong IAM/security background: PKI, SAML, OAuth2/OIDC, JWT, mutual TLS, authentication flows; Red Hat IdM-specific depth to confirm
Security monitoring	Prometheus, Grafana, ELK/Elasticsearch, alerting, vulnerability/security scanning scripts
Scripting	Bash expert 25+ years, 109+ production scripts; Python advanced; Ansible basics; Perl maintenance/exposure
Compliance	PCI-DSS, PSD2, GDPR awareness, DORA-oriented operational resilience, audit support

SKILLS MATRIX - REQUESTED ROLE

Skill / Topic	Years	Evidence / Relevant experience
Minimum relevant experience	30+ IT / 20+ security	Infrastructure, security and regulated banking projects since 1997; 40+ enterprise transformations
Red Hat Linux OS security	20+ related	RHEL/CentOS, Red Hat Linux in Axway environments, Linux hardening, patching, systemd, security baselines
Linux hardening	25+ Linux/UNIX	CIS-style hardening, systemctl, service minimization, SELinux/AppArmor concepts, firewalling, SSH hardening
Red Hat IdM / Directory Server	Related: 8+; product depth to confirm	LDAP/Kerberos/PKI/IAM concepts, authentication/authorization architecture, secure identity flows; Red Hat IdM-specific hands-on to confirm
Kerberos MIT	Related: 8+; operational depth to confirm	Authentication architecture, federation, SSO, SAML/OAuth/OIDC, banking middleware security; Kerberos concepts and troubleshooting exposure
LDAP / Directory services	10+ related	Directory-backed authentication, identity flows, certificate-based security, access controls, middleware integrations
Security monitoring tools	8+ enterprise	Prometheus 1000+ metrics, Grafana 25+ dashboards, ELK/Elasticsearch 500GB+ daily logs, alerting
Security event analysis	10+ related	Log analysis, anomaly detection, Wireshark/tcpdump, vulnerability triage, incident investigation
3rd line support / incident response	20+ operations	L3 support in banking/government environments, root cause analysis, production incident handling
Vulnerability remediation	20+ security	Nessus/OpenVAS concepts, scan_security toolkit, patching, prioritization, audit remediation
Bash scripting	25+ expert	109+ production scripts, Linux automation, security tools, reporting and monitoring automation
Ansible	Basics / related IaC	Configuration management and reproducible hardening concepts; Azure DevOps/IaC automation mindset

Perl	Limited / legacy exposure	Legacy UNIX/Linux script reading/maintenance exposure; not positioned as core expertise
Cloud migration	8+ cloud/devops	ING Belgium Azure hybrid migration, 150+ partners, ExpressRoute, Key Vault, zero disruption
Audit / DORA / control plans	10+ regulated	Banking compliance, PCI-DSS/PSD2 audits, documentation, operational resilience, evidence collection
Professional English / French	Fluent / native	English technical documentation C1 written; French native; Dutch intermediate
RHCE certification	To confirm	RHCE not listed in current certification evidence; Red Hat Linux present in Axway certifications/training

PROFESSIONAL EXPERIENCE

ING BELGIUM - Service Chief Level 4 / Infrastructure & Middleware Specialist | Sept 2019 - Sept 2025 (6 years) | Brussels, Belgium - Hybrid

- Led critical hybrid cloud and middleware infrastructure in a regulated banking environment, combining on-premise systems with Azure cloud services.
- Built and operated enterprise monitoring stack: Prometheus 1000+ custom metrics, Grafana 25+ dashboards, Elasticsearch/ELK with 500GB+ daily ingestion, Kibana analysis and alerting workflows.
- Supported high-availability infrastructure and active-active architectures with strict RTO/RPO targets, production incident management and operational resilience expectations.
- Contributed to security controls, documentation, operational procedures, knowledge transfer and audit-oriented evidence in a banking environment.
- Developed automation and deployment improvements using Azure DevOps pipelines, scripting and standardized operational practices; hackathon-winning deployment acceleration from 4h to 20min.
- Relevant to BNP Linux Security Expert mission: security monitoring, L3 operations, regulated banking, cloud migration, vulnerability/risk remediation, documentation and multicultural teams.

BNP PARIBAS FORTIS - Senior Infrastructure & Integration Consultant | Mar 2017 - Nov 2018 (20 months) | Brussels, Belgium

- Direct BNP Paribas Fortis experience: designed and deployed production-grade API Gateway and integration infrastructure in Brussels.
- Implemented security architecture for PSD2 gateway: OAuth2, Strong Customer Authentication, eIDAS certificate validation, mutual TLS and secure API policies.
- Worked with authentication, authorization, PKI/certificates, SAML/OIDC-related security flows and secure integration of banking services.
- Delivered 60+ REST APIs, 200+ custom security/transformation policies, REST/SOAP integration and production hardening in a critical banking context.
- Created 150+ pages of technical documentation and delivered knowledge transfer to BNP teams; passed compliance audit with zero critical findings.
- Relevant to mission: BNP context familiarity, security operations, identity/access concepts, PKI, audit, regulated production support and Brussels stakeholder environment.

AXWAY SOFTWARE BELGIUM - Senior Consultant & Certified Trainer | Jan 2007 - Mar 2018 (11+ years) | Belgium, Luxembourg, France, Morocco, Netherlands

- Delivered 40+ infrastructure, middleware, security and managed file transfer projects across banking, insurance, government, telecom and retail sectors.
- Worked extensively with Red Hat Linux / UNIX-based enterprise deployments, secure transfer platforms, API gateways, certificate-based authentication and high-availability architectures.
- Certified Axway trainer for API Gateway, Transfer CFT and XFB Gateway; trained 100+ professionals and delivered 200+ hours of technical training.
- Implemented secure protocols and identity/security components: TLS/mutual TLS, PKI, SAML, OAuth2, JWT, EBICS, SWIFT FileAct, SFTP, FTPS, PESIT and AS2/AS3.
- Major engagements: ATOS Worldline global MFT architecture (1M+ daily transfers), French Ministry of Finance AIFE sensitive infrastructure, Luxembourg banking sector.
- Relevant to mission: Linux/UNIX production systems, security hardening, PKI, secure authentication flows, audit support, 3rd line expertise and international collaboration.

Earlier Infrastructure & Systems Roles | 1997 - 2007 | Belgium & Luxembourg

- System and Oracle Administrator at Vedior HQ: Windows/Oracle/server operations and third-line support.
- System Administrator at Province de Luxembourg and consultant missions at ING Belgium, Aubay, Econocom and Reuters environments.
- European Court of Justice migration project: automated migration of 3,000 workstations; infrastructure and system administration foundations.
- Built long-term base in Windows, UNIX/Linux, networking, server administration, troubleshooting and user/business-critical support.

SELECTED SECURITY & AUTOMATION PROJECTS

Project / Tool	Relevance for BNP Linux Security mission
scan_security	Automated security scanning suite: malware/rootkit/ports/processes, reporting, risk scoring and hardening validation
iptables firewall automation	SystemD auto-boot strict firewall rules, logging and stateful inspection on Linux hosts
ssh_control	SSH hardening and monitoring automation, key management, access-control hygiene
create_luks / usb_enc	Linux LUKS encryption automation, secure storage, keyfile workflows and data-at-rest protection
DeepEcho / Overlook / forensic tooling	Local processing, evidence preservation, monitoring, multimedia/security analysis workflows
NoXoZVorteX / Python automation	Parallel processing, data extraction, security conversation analysis, reporting automation

TECHNICAL SECURITY COMPETENCIES

Linux / Red Hat Security

- RHEL/CentOS, Debian/Ubuntu, Kali Linux, UNIX heritage (AIX, Solaris, HP-UX).
- OS hardening: patching, systemd, service minimization, SSH hardening, firewalling, kernel/sysctl tuning, secure baselines.
- SELinux/AppArmor concepts, file permissions, sudo/PAM principles, least privilege and access segregation.

Identity, Authentication & PKI

- LDAP/Kerberos-related authentication concepts, directory-backed access models, PKI/certificate lifecycle and certificate-based authentication.
- OAuth2, OpenID Connect, SAML 2.0, JWT, mutual TLS, eIDAS certificates, SCA and API identity/security patterns.
- Identity and access troubleshooting across middleware/security platforms; Red Hat IdM/Directory Server product depth to confirm.

Monitoring, Detection & Vulnerability Management

- Prometheus/Grafana/ELK/Elasticsearch/Kibana, log aggregation, dashboarding, alerting and event analysis.
- Wireshark/tcpdump/tshark, NetFlow concepts, network anomaly analysis and incident investigation.
- Vulnerability assessment/remediation: Nessus/OpenVAS concepts, CVE watch, prioritization, patching and audit evidence.

Scripting & Internal Solutions

- Bash expert: 25+ years, 109+ production scripts for automation, security tooling, scanning, reporting and operations.
- Python advanced: 37+ projects, API clients, parsing, reporting, parallel processing and workflow automation.
- Ansible basics / IaC mindset; Perl legacy maintenance exposure; Azure DevOps pipelines and Git-based documentation.

Regulated Banking / Compliance

- PCI-DSS and PSD2 experience; compliance audits with zero critical findings on BNP PSD2 gateway work.
- DORA-relevant operational resilience: control plans, critical asset recovery, incident response, documentation, traceability and monitoring.
- International/multicultural collaboration across Belgium, Luxembourg, France, Netherlands, Morocco and Switzerland.

CERTIFICATIONS, LANGUAGES & AVAILABILITY

Category	Details
Certifications	Axway API Gateway Trainer (2016), Axway Transfer CFT Trainer (2007), Axway XFB Gateway Advanced Trainer (2007), Axway API Gateway (2015), CCSP preparation series completed (6 courses).
Red Hat / RHCE note	Current evidence includes Red Hat Linux-linked Axway certifications/training and long-term RHEL/CentOS/Linux operations. RHCE certification status must be confirmed before submission if mandatory.
Languages	French: native English: professional / C1 written technical documentation Dutch: intermediate professional
Location / model	Rochefort, Belgium; Brussels hybrid feasible; experienced in 50% on-site / 50% remote banking environments.
Availability	ASAP / 2-3 weeks depending on contract setup and onboarding.
On-call	Available to discuss rotational on-call; experienced with critical production support and incident response.

WHY BRUNO FOR THIS BNP MISSION

- Direct BNP Paribas Fortis Brussels experience and proven ability to deliver in regulated banking environments.
- Strong Linux/security foundation with hands-on hardening, monitoring, scripting and incident support experience.
- Rare bridge profile: Linux/UNIX operations + security architecture + IAM/PKI + automation + audit/compliance.
- Operational mindset: not only design - production support, troubleshooting, documentation, knowledge transfer and resilience.
- Honest fit: very strong for Linux security, hardening, monitoring, PKI/IAM and scripting; Red Hat IdM/RHCE status should be confirmed before final submission.
