Target role: Solution Architect - ATOS / Flemish Government - Brussels Hybrid | Custom-built applications, API/middleware, cloud, delivery-oriented architecture

PROFESSIONAL PROFILE

Hands-on Solution Architect and senior integration engineer with 30+ years of IT experience, including 18+ years designing pragmatic enterprise integration, API management, secure file transfer and hybrid cloud solutions. Strong fit for customer-facing consulting missions requiring translation of functional/business needs into concrete, implementable architectures. Proven track record across Belgian banking, public sector, government, insurance, retail and international environments.

Delivery mindset: works close to development, infrastructure, security and business stakeholders; explains and defends architectural decisions; negotiates realistic trade-offs between scope, cost, quality and time; documents designs in a practical way; coaches engineers and transfers knowledge.

ROLE ALIGNMENT - ATOS / FLEMISH GOVERNMENT

Requirement area	Relevant evidence
Customer / consultancy focus	40+ client projects across Belgium, Luxembourg, France, Netherlands, Switzerland and Morocco. Public-sector references include Vlaams Overheid and French Ministry of Finance AIFE. Strong consulting and stakeholder communication background.
Custom-built applications & delivery	Architecture and implementation support for REST/SOAP APIs, backend integrations, authentication flows, data transformations, secure file exchange and enterprise application landscapes.
API gateways / API management	18+ years Axway API Gateway/API Manager expertise; 500+ custom policies; 60+ REST APIs and 200+ policies at BNP Paribas Fortis; 150+ developers supported via API Manager.
Modern architecture	Practical exposure to microservices patterns, containers, Docker/Kubernetes basics, Azure hybrid cloud, CI/CD pipelines and application deployment constraints.
Non-functional requirements	Performance, availability, security, maintainability and operability: 10,000+ TPS, 1M+ daily transfers, active-active HA, zero-downtime migration, monitoring and audit readiness.
Security by design	OAuth2, OpenID Connect, SAML 2.0, JWT, mutual TLS, PKI, API security, confidentiality, logging, PSD2/PCI-DSS/DORA-aware environments.
Agile / DevOps collaboration	Azure DevOps YAML pipelines, CI/CD automation, Scrum exposure, knowledge sharing, technical coaching, documentation and handover.
Languages	French native, English professional C1 written/B2 spoken, Dutch professional working proficiency.

CORE TECHNICAL COMPETENCIES

Domain	Capabilities
Solution architecture	Business/functional need analysis, pragmatic solution design, trade-off management, implementation roadmaps, technical blueprints, stakeholder alignment.
Application & integration architecture	REST, SOAP, OpenAPI/Swagger, GraphQL basics, backend integration, message transformation, XML/XSLT, JSON, EDI, request/reply, publish-subscribe patterns.
Middleware / API platforms	Axway API Gateway, API Manager, Transfer CFT, Secure Transport, Gateway XFB/Interpel, Sentinel; API lifecycle, policies, throttling, transformation, HA, security enforcement.
Cloud / containers / DevOps	Azure VMs, VNet, ExpressRoute, NSG, Key Vault, Storage; Docker/Kubernetes basics; Azure DevOps YAML pipelines; automated deployments and rollback.
Security & NFRs	OAuth2, OIDC, SAML, JWT, mTLS, PKI, certificate management, logging, monitoring, availability, performance, auditability, confidentiality.

Domain	Capabilities
Architecture methods & modelling	Practical TOGAF concepts, ArchiMate/UML exposure, MS Visio architecture diagrams, detailed technical design documents, operational documentation.
Development proximity	Close collaboration with developers and engineers; scripting in Bash/Python/PowerShell; API testing; log analysis; troubleshooting and 3rd-line support.
Collaboration & coaching	Axway Certified Trainer, 200+ training hours, 100+ professionals trained, mentoring, handover, customer workshops, knowledge sharing.

PROFESSIONAL EXPERIENCE

ING BELGIUM | Middleware Specialist / Solution Architect - Integration & Hybrid Cloud

Sept 2019 - Sept 2025 | 6 years | Brussels, Belgium | Hybrid

- **Solution architecture:** translated business, operational and security needs into implementable integration and infrastructure solutions for critical banking environments.
- **Hybrid cloud migration:** led technical architecture for MFT infrastructure migration to Azure, connecting on-premise systems with Azure services via ExpressRoute, VNet, NSG, Key Vault and Storage Accounts; 150+ file transfer partners maintained without business disruption.
- **High availability:** designed active-active Axway XFB Gateway architecture for ING-ISABEL banking network, integrating 200+ backend systems with automated failover and minimal RPO/RTO.
- **DevOps delivery:** built Azure DevOps pipeline automation reducing deployment time from 4 hours to 20 minutes; solution adopted by other teams.
- **Observability:** implemented Prometheus, Grafana and ELK/Kibana monitoring stack with 1000+ metrics and operational dashboards, reducing detection and response delays.
- **Coaching/documentation:** mentored engineers, created 200+ pages of architecture/procedure/troubleshooting documentation, supported delivery teams and external service providers.

BNP PARIBAS FORTIS | Senior Solution Architect / Axway API & Integration Consultant

Mar 2017 - Nov 2018 | 20 months | Brussels, Belgium

- **API platform architecture:** designed and deployed production API Gateway cluster (4 nodes) and API Manager platform serving 150+ registered developers.
- **Custom application integration:** delivered 60+ REST APIs, 200+ custom policies and REST-to-SOAP integration layers connecting banking applications and legacy systems.
- **Security by design:** architected PSD2 gateway for TPP access with OAuth 2.0, Strong Customer Authentication, eIDAS certificate validation and fraud detection hooks; passed regulatory audit with zero critical findings.
- **NFR implementation:** improved API response time by 35% through caching, connection pooling and policy optimization; supported availability, maintainability and auditability requirements.
- **Stakeholder enablement:** delivered 40 hours of training, 150+ pages of documentation and successful handover to BNP teams with 4.8/5 client satisfaction.

AXWAY SOFTWARE BELGIUM | Senior Consultant / Solution Architect / Certified Trainer

Jan 2007 - Mar 2017/2018 | 10+ years | Belgium, Luxembourg, France, Netherlands, Morocco

- **Consulting delivery:** completed 40+ customer projects across banking, insurance, government, telecom, retail and automotive sectors; 98% success rate.
- **ATOS Worldline reference:** designed global MFT architecture from scratch, deployed across 15+ countries, supporting 1M+ daily transfers with HA/DRP, monitoring, external partner integration and operational support.
- **Public sector reference:** Vlaams Overheid secure government file exchange project; French Ministry of Finance AIFE secure platform for 15,000+ users with strong security and documentation requirements.
- **Architecture & coaching:** created reusable integration patterns, security policies, operational standards and technical documentation; trained and coached client teams as Axway Certified Trainer.
- **Technical scope:** API Gateway, API Manager, Transfer CFT, Secure Transport, Gateway XFB/Interpel, Sentinel, REST/SOAP, OAuth/SAML, mTLS, PKI, EBICS, SWIFT FileAct, AS2/AS3, PESIT.

Econocom / Aubay / Province de Luxembourg / Amsit-ING / Vedior | Selected earlier infrastructure roles

1997 - 2007 | Belgium & Luxembourg

- **Infrastructure foundation:** system administration, Windows/Oracle support, network and infrastructure support, Microsoft environments, public administration, finance/dealing room environments.
- **Large-scale delivery:** Aubay / European Court of Justice: automated migration of 3,000 workstations, infrastructure modernization and operational support.

SELECTED PROJECT REFERENCES RELEVANT TO THIS MISSION

Client / context	Relevance
Vlaams Overheid	Public sector secure government file exchange; stakeholder-sensitive environment.
ATOS Worldline	Senior Consultant Architect; global MFT architecture across 15+ countries; 1M+ daily transfers; HA/DRP and partner integration.
BNP Paribas Fortis	API Gateway/API Manager, PSD2 gateway, 60+ REST APIs, 150+ developers, security and technical documentation.
ING Belgium	Hybrid cloud migration to Azure, active-active architecture, DevOps pipelines, monitoring and operational excellence.
French Ministry of Finance - AIFE	Government secure transfer platform, 15,000+ users, strict security and documentation environment.

EDUCATION, CERTIFICATIONS & PROFESSIONAL VALIDATION

- **Axway Certified Trainer:** API Gateway Trainer, Transfer CFT Trainer, XFB Gateway Advanced Trainer; one of a limited group of certified trainers; 200+ hours delivered to 100+ professionals.
- **Cloud & security training:** CCSP preparation series completed: cloud architecture, data security, platform security, application security, operations, legal/risk/compliance.
- **Professional validation:** LinkedIn endorsements: Integration, Security, Cloud Computing, Unix/Linux; 12 client recommendations emphasizing quality delivery and problem-solving.

LANGUAGES & AVAILABILITY

Item	Details
Languages	French: native English: professional C1 written / B2 spoken Dutch: professional working proficiency
Location	Rochefort, Belgium - available for Brussels hybrid model
Work model	Hybrid / on-site / remote; 6 years hybrid work experience at ING Belgium
Availability	Available immediately / short notice depending on contract setup

Positioning note: *This CV is tailored for a pragmatic, delivery-oriented Solution Architect role close to development teams, customers and public-sector stakeholders.*
